Only the Best for You!

Keeping your teeth clean between your dental visits.

You know that brushing your teeth everyday can help you avoid cavities, but that's not enough to keep your

teeth healthy. Did you know that if you don't floss, you're leaving up to 40% of your tooth surface unclean? If you have questions on if it's time or how to floss your child's teeth ask your child's assistant at your next visit.
